EDUCATION

Master of Science in Artificial Intelligence and Data Science
University of Economics and Business
Athens, Greece
2027

Bachelor of Science in Computer Science
University of Piraeus
Athens, Greece
Aug 2023
Major in Data Manipulation

Professional Summary

Data Scientist and Analyst with 3+ years of experience specializing in customer analytics and business impact. Proven track record of driving a 15% improvement in model performance and a 6% increase in gross margin through advanced Marketing Mix Modeling, price elasticity analysis, and customer segmentation. Experienced in Revenue Growth Management projects including ROI and promo effectiveness analysis. Skilled in developing scalable, production-ready ML solutions on AWS and Azure cloud platforms. Currently optimizing intelligent automation solutions through Agentic AI, leveraging Vertex AI's generative capabilities to enhance customer support efficiency. Adept at translating complex business challenges into actionable data-driven strategies, with a strong focus on stakeholder collaboration and deployment across multiple markets.

Work Experience

Data Science Analyst at Accenture Greece

2024 - Present | Athens, Greece

- Led fuel price elasticity analysis for a new retailer, resulting in a 6% increase in gross margin over 3 months through ML-based competitor analysis in Azure Databricks; mentored teammates and took a leading role in project execution.
- Created customer segmentation and value prediction models that improved F1 score by 15%, with my innovative ideas driving the success and adoption of the approach in 3 additional markets.
- Designed and deployed ETL workflows with Docker, Azure DevOps, and AWS, reducing manual work by at least 25% through automation.
- Developed algorithms for Revenue Growth Management (RGM) project focusing on Marketing Mix Modeling, including elasticity modeling, ROI calculation, promo effectiveness, and cross-effects analysis; this generalized approach was adopted as an Accenture asset for multiple clients.
- Optimizing intelligent automation solutions with agentic AI to enhance customer support efficiency, leveraging Vertex AI's generative capabilities and agent orchestration.

Machine Learning Engineer & Python Developer at Linked Business

2022 - 2024 | Athens, Greece

- Implemented text mining and text classification approaches on financial data to enhance business insights and competitor analysis using public Greek resources such as the General Business Registry.
- Developed and maintained NLP models for contact search and information extraction, increasing the amount of harvested contact data by 40% compared to previous manual methods.
- Improved employee data extraction models by 20%, optimizing accuracy and efficiency.
- Enhanced financial data harvesting by approximately 18%, replacing paid third-party tools and significantly reducing company expenses.
- Integrated multiple data sources into a unified platform, improving the quality and breadth of business intelligence for clients.

Volunteering & Leadership

Data Analyst at Butterfly

2021 - 2022 | Athens, Greece

- Collected and analyzed demographic and clinical data from health-focused events.
- Created simple visualizations to communicate insights.
- Authored articles and reports based on findings and meetings with doctors and healthcare professionals.

Certifications

Azure AI Fundamentals

foundational cloud AI knowledge.

SKILLS

Data Science & ML: Exploratory Data Analysis (EDA), Feature Engineering, Regression, Classification, Forecasting
Cloud Platforms: AWS, Azure, Azure Databricks
Languages/Tools: Python, R, PySpark, SQL, Docker, Git, Airflow
ML Libraries: TensorFlow, Keras, scikit-learn, XGBoost, LightGBM, CatBoost, Statsmodels, Pandas, NumPy
Web/DevOps: CI/CD, Azure DevOps
Visualization: Matplotlib, Seaborn, Plotly, Tableau

LANGUAGES

English (Fluent), Greek (Fluent)

Marketing Analytics for Business

advanced marketing data analysis techniques.

Deep Learning Specialization – IBM

Aug 2023 – Nov 2023

comprehensive deep learning skills.

Business Analyst Certificate - University of Athens

Oct 2021 – Feb 2022

strong business analysis foundation.
