

Gerasimina Stefanatou

DATA SCIENTIST

stefanatougerasimina@gmail.com
+30 6942542456

PROFESSIONAL SUMMARY

ML practitioner with 4+ years building production-grade models in retail and financial services - price elasticity, customer segmentation, and revenue growth management. Comfortable owning full pipelines from EDA to cloud deployment.

WORK EXPERIENCE

Data Scientist - Analyst

2024 - Present

Accenture Greece | Athens

- Led POC for store and customer segmentation & profiling, mentoring junior participants, and full ownership of client deliverables.
- Built fuel price elasticity model for new retailer client using XGBoost + competitor analysis in Azure Databricks - drove +6% gross margin in 3 months.
- Designed customer segmentation and value prediction pipeline; +15% F1 score improvement, approach adopted across 3 additional markets.
- Developed Marketing Mix Modeling framework for RGM - elasticity, ROI, promo effectiveness, cross-effects - now used as an Accenture reusable asset.
- Automated ETL workflows with Docker + Azure DevOps, reducing manual effort by ≥25%.
- Contributed to building a chatbot for market research with Vertex AI.

ML Engineer & Python Developer

2022 - 2024

Linked Business Athens

- Built NLP models for contact extraction from Greek public registries — +40% data yield vs manual methods.
- Improved employee data extraction accuracy by 20%; enhanced financial data harvesting by ~18%, replacing paid third-party tools.
- Developed text mining and classification pipeline on financial data for competitor analysis using public Greek sources (GEMI).

Volunteering

NGBO Buterfly

2021 | 2022 | Athens, Greece

- Collected and analyzed demographic and clinical data from health-focused events.
- Created simple visualizations to communicate insights.
- Authored articles and reports based on findings and meetings with doctors and healthcare professionals.

EDUCATION

MSc · AI & Data Science

Athens University of Economics & Business

Expected June 2027

BSc · Digital Systems

University of Piraeus

2023 · Data Manipulation track

8.2/10

Thesis on Timeseries Forecasting on Air Quality data with LSTM models.

SKILLS

Predictive Modeling

End-to-end ML pipelines - regression, classification, forecasting - from EDA to production.

Causal & Econometric Analysis

Price elasticity, marketing mix modeling, ROI attribution, promo effectiveness.

Cloud & MLOps

Scalable pipelines on Azure Databricks, AWS, and Vertex AI with CI/CD and containerization.

STACK

Languages - Frameworks

Python, Pyspark, Pytorch, Java, SQL

ML

SHAP, Optuna, Prophet, Hugging Face, Tensorflow, Scikit Learn, Statsmodel

Cloud & MLOps

Azure Databricks, AWS, Vertex AI

Infra

Docker, Airflow, Azure DevOps

CERTIFICATIONS

Deep Learning Specialization - IBM
Business Analytics - UoA
